

Correction to reports on ALC participation in carbon campaign

Reports in today's media that ALC is part of an industry advertising campaign on a Carbon Tax are incorrect. ALC has taken no decision to participate in an advertising campaign.

ALC's view on the Carbon Price will be informed by the package's final design.

We await the release of the Government's policy on a Carbon Price. Following its release, ALC will be in a better position to understand how it will potentially affect Australia's freight transport and logistics industry.

ALC urges the Multi Party Climate Change Committee to finalise its deliberations and for the final Carbon Price package to be released as soon as possible.

The sooner the Federal Government does this, the sooner we can have an informed debate about its contents, and its impact on the Australian freight transport and logistics sector.

Ends. Friday 1 July 2011
