

TASK 2 – RISKS & CONTROLS

What sort of risk types and control measures should be considered in relation to the maintenance and repair of vehicles?

Here are some key words/phrases

- Pre trip systems
- Repair request process
- Repair request administration - prioritisation, repair request rating and record management
- Preventative Maintenance structures incl annual roadworthies
- Work Order administration - close out, deferrals etc - incl closing the loop with drivers and operators
- Liaison with Original Equipment Manufacturers
- Competence of maintainers - Maintenance Statements of Compliance?
- Tagging out of items of equipment
- Roadworthy vs Not Roadworthy
- Speed limiter and suspension maintenance
- Closing the loop with Maintainers incl rework
- Internal reviews - is it working?

TASK 3 - TECHNICAL REFERENCES – MAINTENANCE

What 'freely available' technical references should be included in the Master Code?
