LOGISTICS
COUNCIL
SUPPLY CHAIN EFFICIENCY AND SAFETY

Fresh milk from Bega. Still fresh in Beijing.

We believe technology has the power to do wonders.

It can elevate, accelerate, even relocate you to places
you never thought possible.

When one Aussie dairy corporation wondered
how far their business could go,
we created an IoT solution enabling them
to deliver Aussie milk, all the way to China...
keeping it fresh over 7,000km away.

With the power of our network, and our unique
ability to curate partnerships with a breadth of
services and solutions, imagine where
we could help take your business.

With your vision and our expertise,
together, we'll do wonders.

WELCOME

The Australian Logistics Council (ALC) welcomes you to the inaugural Supply Chain Technology Summit 2018.

Technology is a major component of the logistics supply chain and will play a dominant role in the supply chains of the future. The Supply Chain Technology Summit will focus on the policy priorities articulated by ALC in [Freight Doesn't Vote](#) - our submission to the Inquiry into National Freight and Supply Chain Priorities.

Sessions will include Blockchain, the role of big data, collecting better data on freight movements, port community systems, the potential for Artificial Intelligence and augmented/virtual reality to enhance workforce productivity, adapting to automation, global data standards, and driving better safety outcomes through heavy vehicle telematics.

With over 100 representatives from across the supply chain attending the Summit, including ALC members, suppliers, consultants, researchers, and operators. The Summit is organised by the Australian Logistics Council, and is held in conjunction with

The ALC Supply Chain Technology Summit is supported by:

Event partner

AUSTRALIAN LOGISTICS COUNCIL

The Australian Logistics Council (ALC) represents the major Australian logistics supply chain customers, providers, infrastructure owners and suppliers.

ALC is Australia's leading industry advocate for supply chain efficiency and safety.

ALC works with government at all levels to ensure it considers the needs of the logistics industry in its investment and policy decisions. ALC focuses its advocacy efforts on five key areas with the aim of improving supply chain efficiency:

- Safety
- Technology
- Infrastructure
- People
- Regulation
